A draft patent specification is attached. Please review it for accuracy and completeness.

Substantial changes should be made in MS Word edit mode (pull down "Tools" and click "Track Changes") so that I can see the changes. Communicate minor modifications via phone or e-mail.

Collaborate with all co inventors and agree on any changes.

The drawings are on the way to 3-0078. Communicate any drawing changes ASAP and I forward them to the patent draftsman.

Your questions and comments are welcome. << File:CS11370 SPC
